**RISK MANAGEMENT** (continued)

The Credit Policy of the Bank describes and defines the principles for the management of the credit risk and it relates to all activities of the Group and the Bank involving credit risk – lending, financial market transactions (operations), intermediary activities on behalf of the clients and issue of guarantees to third parties.

The Bank's Risk Management Committee monitors the credit risk, including credit risk concentrations, and the quality of the credit portfolio, whereas central, regional and branch credit committees are taking decisions on the credit risk within the approved limits. The Bank's Risk Management Department is responsible for analysis of the credit risk concentration, setting and controlling the limits as well as the evaluation of the quality of the credit portfolio, whereas the Bank's Loan Department and Treasury Department is responsible for daily credit risk management in lending operations and operations with financial instruments respectively.

The Group and the Bank monitors the credit risk by assessing the creditworthiness and adequacy of collateral of the customer or counterparty on a regular basis as well as controls the credit risk at the level of customer, related customers and sectors of economy according to the risk limits set at the Group and the Bank.

The Group and the Bank manages credit risk concentrations according to the Risk Exposures Controlling Policy that stipulates the methods of analysis of the credit risk concentrations and its controlling instruments including limits on credit risk concentrations. Credit risk concentrations is managed by measuring and setting limits on the following concentrations:

- ratio of large exposure concentration and own funds (internal limit - 400%, limit set by the Law on Credit Institutions – 800%), as of 30.06.2008. was 21% (as of 31.12.2007.-79%);

The Group and the Bank manages the country risk that results from the lending operations to non-residents according to the Country Risk Management Policy.

***Liquidity Risk***

The liquidity risk relates to the ability of the Group and the Bank to redeem the legally valid claims of its customers and other creditors in due time and secure that the increase of the anticipated claims presents reasonable costs. The Assets and Liabilities Committee of the Bank stipulates the guidelines for liquidity risk management and controls compliance thereof, whereas the Treasury Department provides for daily management of the liquidity risk. To evaluate the liquidity risk, the Bank uses the GAP method. The Bank has set liquidity net position limit in each significant currency and total liquidity net position limit as well as maximum deposit amount from a single depositor to control the liquidity risk. Liquidity ratio (min – 30%) as of 30.06.2008. was 96.7% (as of 31.12.2007.-101.6%).

***Foreign Currency Risk***

The Currency Risk Management Policy of the Bank stipulates the principles for the management of the foreign currency risk.

The Group and the Bank controls the foreign currency risk by imposing limits on the open currency positions for each currency and all currencies together consolidating in lats and by complying with the open currency position limits established in the law On Credit Institutions.
